

CLAIM AMENDMENTS

Claim 1 (Currently Amended). A pallet, comprising:
a base member having top and bottom surfaces, said top
surface defining first and second spaced apart handle openings
near an edge of said top surface and third and fourth spaced
apart bin openings near an opposed edge of said top surface;

four hollow legs extending downwardly from said bottom
surface and defining lateral and a transverse passageways below
said bottom surface adapted to receive lifting forks;

four wheel means, one for each hollow leg, each said
wheel means being fastened to said base member inside an
associated hollow leg and extending downwardly from said base
member to an elevation below said associated hollow leg so that
said wheel means is free to move said base member while being
generally obscured from view by said associated hollow leg;

a handle having first and second upright members having
bottom end portions removably inserted in said first and second
spaced apart handle openings and a horizontal member connecting
top portions of said first and second upright members; and
members;

first and second flanges attached to said bottom end
portions of said first and second upright members, said flanges
resting on said top surface when said upright members are
inserted in said first and second openings. handle openings;
and

a panel attached to said first and second upright
members below said horizontal member;

a bin having a closed sidewall and a bottom with two
spaced apart downwardly extending protrusions removably
inserted in said third and fourth bin openings of said top
surface of said base member, said first and second upright

members of said handle being disposed inside said closed
sidewall.

Claims 2-13 (Cancelled).
